CVO-DP-32	Convex Acrylic Wide View/Deep Drawer Mirror	32"	7"

Convex Mirrors are a retail store's first line of defence against shoplifting and pilferage. Each increases aisle visibility and eliminates blind spots.

Improve vision into aisles and around corners. Our new DomeVex Deep Draw design opens up a whole different world of vision and provides a wider view in all directions. They mount like a Convex and protect like a Mirrored Dome. Mounting hardware included.

Excellent visibility-low distortion, good choice for high traffic aisles, more than twice the view. Excellent choice for prisons, jails, industrial applications where breakage and vandalism is high.

Mirrors are lightweight, fade-proof and virtually unbreakable with top-quality silvering and near-perfect convexing which affords the widest angle of vision.

Lighter and brighter than glass. Each mirror individually packaged, complete with adjustable chrome-plated mounting bracket. Single mounting bracket provided for indoor use and two/three brackets for outdoor. Also excellent as safety mirrors in preventing industrial intersection accidents.

Key Features:

- **Virtually unbreakable**
The potential danger and liability of having treacherous glass overhead is eliminated.
- **20% Brighter**
Special mirroring techniques provide a 20% brighter image than glass.
- **Less Distortion**
Special forming techniques provide an optical image that is superior to glass.
- **Longer Lasting**
Made from high quality Acrylic and will not discolour over time as glass frequently does.
- **Lighter Weight**
As Acrylic is much lighter than glass, it is easier to handle and install.
- **Economical**
Less expensive and eliminates the high cost of replacing broken glass mirrors.
