**RE: Registration, Evaluation & Authorization of Chemicals (REACH) (EC 1907/2006)
(Substances of Very High Concern (SVHC), Annex XIV and Annex XVII Lists)
Plaskolite Polycarbonate Products**

To Whom It May Concern:

Plaskolite's polycarbonate products (e.g., Tuffak®, Hygard®, coated polycarbonate, polycarbonate mirror) are "articles" according to Article 3(3) of REACH, which the regulation defines as "an object which during production is given a special shape, surface or design which determines its function to a greater degree than its chemical composition".

Substances of Very High Concern (SVHC) Candidate List: To the best of our knowledge, concerning product composition including supplier information, Plaskolite's polycarbonate products do not contain any substances on the most current Candidate List for inclusion in Annex XIV of REACH/SVHC above the threshold level of 0.1% by weight of the article.

Annex XIV (or Annex 14) Authorization List: Substances on this list are selected from the REACH SVHC Candidate List, and they cannot be placed on the market or used after a given date ("sunset date"), unless an authorization is granted for their specific use, or the use is exempted from authorization. Our polycarbonate products comply with the most current Annex XIV Authorization List.

Annex XVII (or Annex 17) Restrictions List: This list contains restrictions of certain hazardous substances, mixtures and articles for their marketing and use on the European market. Our polycarbonate products comply with the most current Annex XVII Restrictions List.

We hope that this information is useful to you, and provides clarity on Plaskolite's compliance with REACH. Please contact us at (800) 848-9124 if you have any questions related to this matter.

Sincerely,

Plaskolite Product Support Team

The information presented herein is believed to be factual and reliable. It is offered in good faith, but without guarantee, since conditions and methods for the use of our products are beyond our control. We recommend that the prospective user determine the suitability of our products and these suggestions before adopting them on a commercial scale.
